

# LIQUID SPACES

Scenography, Installations and  
Spatial Experiences

gestalten

A gathering of gentle, cloud-like objects form a temporary, site-specific installation forming with sensation. The limbo-like cloudscape submerges visitors into an ethereal moment of quiet. Similar to the floating nature of cloud patterns as they form and dissipate, the custom-sensitive objects react to the surrounding environment. As one leaves a space, the clouds begin to entangle with light. When one returns, the pillow-like forms revert back to neutral, leaving a trail of darkness behind them. Fabricated from translucent and tissue paper, the material's billowing lightness and translucent character gracefully fill the space. Natural imperfections in the process and folds evoke the ephemeral glow of clouds reflecting the last rays of light at dusk. ■
